

# SX **S** Type

200

A Better Lambretta ! Engine partially stripped and rebuilt to exacting tolerance, silencer strengthened and locked on, fitted lever balls, Sebring sports carrier, damper gaiters, spare wheel and legshield mount. Cellulosed to 'S' design in any second colour, with a chrome motif on the shield and each panel.

SX List Price plus £9. 0. 0d.

There are many scooterists who prefer extra power by attentions to a standard engine rather than over-boreing. As well as the modifications to the disc brake, engine mount etc, "Extra S" recommended tuning includes opening the 20 mm carburettor to 21.7 mm, fitting a high performance silencer and balancing the induction restriction, jetting and port opening to suit.

Independant testing of the 'S' 200 has given speeds in excess of 70 mph, the 'Extra S' and 225 'S' type having better acceleration and a top speed around 75 mph.
