

GO **12 VOLT** IN 1967

Probably the most important innovation towards safety - 40/45 W Power 12 volt headlight without fluctuation with engine revolutions, the facility for auxiliary lamps if required - solid harsh white light even without the engine running! We list below the installation prices for the Basic and Pathfinder systems to the most popular models when new - the figures in brackets are the average cost to a used machine.

12v Lambretta Slimstyle.		£9. 9. 0. (£16. 0. 0.)
12v " " Pathfinder		£25. 0. 0. (£32. 0. 0. & £38. 0. 0.*)
12v Vespa SS.180		£12. 12. 0. (£18. 0. 0.)
12v " " Pathfinder		£25. 0. 0. (£32. 0. 0.)
12v Vespa SS.90		£19. 19. 0. (£25. 0. 0.)
12v " " Pathfinder		£30. 0. 0. (£38. 0. 0.)

* If a second 6v battery is fitted into the Toolbox to a used Slimstyle, the price is £32. With a single 12 volt battery, special mountings etc. £38.

Every Pathfinder system incorporates two auxiliary lamps mounted on either side of the legshield and operated by concealed wiring to a fingertip switch control built into the handlebars. The wiring is ready for additional equipment, virtually any 12 volt component from an electric kettle to compressor sprint air horns being acceptable.

The complexities of the wiring for the 12v 90. SS and all Pathfinder Systems prohibits these being effected other than in our own workshops. Simple Do-It-Yourself Standard Kits including a re-wired exchange stator plate are available for :-

All Slimstyle Models. Send complete stator plate and rectifier box with remittance of £13. 10. 0d.

All SS.180 Models. Send complete stator plate and remittance of £15. 10. 0d.
